Please see the emails below. No problems, I just wanted everyone to be aware of the coordination of this issue.

Also, Jeff Speir asked me about the letter to Chemours, and he would like to see if when we are ready to share the draft.

Please advise me when the drat is ready to share with OECA.

Andy

Thanks, Jacqueline. I think this is fine for now. Susan Bodine was making the inquiry. I think she's just trying to develop an understanding of the sites out there and how EPA is responding. If there's something more, I'll be back in touch.

Talk to you at 4:30!

Peace, Elisabeth

Hi Jacqueline,

Do you know what authority EPA is using to request information from Chemours?

Thanks, Elisabeth

Elisabeth and Peter – I know you are aware of this site. Do you know what authority the Region is relying on to request information? Any other thoughts to pass on to Cyndy? Thanks -Helena

Subject: Chemours Washington Works

Region III is preparing a letter with a formal request that the Chemours Company sample for the compound, GenX, in public and private water supplies in the vicinity of its Washington Works, West Virginia facility.

Chemours also owns and operates a facility in Fayetteville, North Carolina where it manufactures GenX. Sampling conducted over the past few years at the North Carolina facility has identified GenX in the Cape Fear River and numerous drinking water supplies both proximate to and downstream of the facility. In 2016, an ORD study conducted around the Washington Works, WV facility, identified GenX in nearby surface water bodies. ORD has informed us that this study will be published in February 2018. Data generated by Chemours indicates that GenX is present in groundwater on their property at high levels. Region III wants to be proactive and have Chemours sample drinking water wells in the Washington Works area, in conjunction with ongoing sampling for PFOA conducted by Chemours pursuant to a prior Consent Order. Sampling will help characterize the human exposure to GenX in the Washington Works area.

We have been coordinating with EPA Region 5, EPA HQs, Ohio EPA and WVDEP to draft the letter and anticipate sending the letter by the end of the month under the acting Water Division Directors signature.
